Sultex Sales Success in Indonesia

Leading Swiss-based weaving machine manufacturer Sultex has sold 30 Sulzer Textil G6500 rapier weaving machines to PT. Unggulrejo Wasono, Indonesia.

PT. Unggulrejo Wasono was established in 1979 and is located in Purworejo, Central Java, Indonesia. The weaving facility covers an area of 2 ha and 40% of the high-quality fabric produced is for export markets.

“We opted for the G6500 because of its high performance, its versatility, its reliability and the excellent fabric quality. In addition, with Sultex we have a superb partner with outstanding local technical support” says Martin Lukas, Director of PT. Unggulrejo. “With this machine we will enhance our exports of high-value-added dobby fabrics for the apparel segment.”

In weaving mills throughout the world, the Sulzer Textil G6500 has consistently proved to be the perfect weaving machine for producing top-quality, upmarket fabrics.
